

# Concrete Canvas - Concrete on a Roll® by Concrete Canvas Ltd

# CONCRETE CANVAS®

## Concrete Canvas®

- Concrete Canvas® products are flexible, concrete filled geotextiles that harden on hydration to form a thin, durable, waterproof, lower carbon concrete layer. Essentially, it's Concrete on a Roll®

## Key Features and Benefits

- Rapid installation – up to 10x faster than conventional concrete solutions
- Easy to use – Minimal training required, can be installed with basic hand tools
- Lower Project Costs – Reduced line possession, less labour and plant required onsite, low maintenance
- Lower Carbon – Provide >60% CO<sub>2</sub>e savings when replacing conventional concrete solutions

## Exploitation

- Used across many sectors including rail, road, mining and petrochemical
- GCCMs are used for non-structural applications and erosion control
- Trusted by many tier 1 contractors globally
- Extend the life of existing, failing infrastructure

## Additional Information

- All products manufactured at our South Wales HQ
- >120-year design life when used for erosion control
- >5x as abrasion resistant as standard OPC concrete
- Applications; Channel Lining, Slope Protection, Crest Drainage, Concrete Remediation, Culvert Lining & Weed Suppression
